Leading Medium Voltage Power Factor Correction Equipment Into The 21st Century

Corporate Summary

NEPSI manufactures medium voltage (2.4kV through 34.5kV) capacitor banks and harmonic filter banks for power factor correction. The founders and top level personnel have over 30 years experience in the design, development, and analysis of industrial, utility, and commercial power systems and power factor correction

equipment. This experience is coupled with licensed professional engineers with post-graduate degrees in Electric Power Engineering. NEPSI's equipment is designed and built on sound engineering principles with total quality and customer satisfaction as guiding principles.

Products

- ◆ Medium-Voltage Fixed and Automatic Metal-Enclosed Capacitor Banks and Harmonic Filter Banks for Utility, Industrial, and Commercial Power Systems.
- ◆ Pad-Mounted Capacitor Banks and Harmonic Filter Banks
- ◆ Rack Mounted Capacitor Banks and Harmonic Filter Banks
- ◆ Low Voltage Automatic Capacitor Banks and Harmonic Filter Banks
- ◆ Motor Surge Protection
- ◆ Medium-Voltage Transient Voltage Surge Protection
- ◆ Capacitor and Filter Bank Control & Protection Systems

Engineering Services

To provide performance guarantees and application support, our professional engineers may perform one or more of the following system studies.

- ◆ Power Flow Studies
- ◆ Transient Analysis
- ◆ Power Quality Studies
- ◆ On-Site Measurements
- ◆ Arc-Flash Studies
- ◆ Harmonic Studies
- ◆ Power Factor Studies
- ◆ Loadflow Studies
- ◆ Short Circuit Studies
