

Types VIZ-15 and VIZ-15G Indoor voltage transformers

Product features

- 25 kV indoor
- 150 kV BIL, 60 Hertz
- Primary volts: 12000 - 34500

Application

The VIZ-15 and VIZ-15G indoor voltage transformers are designed for service in metalclad switchgear and are used for metering, relaying, or control power. Both units are available in single, double, and tapped secondary designs with two accuracy and thermal rating options.

Construction features

The primary and secondary coils are wound using special winding and shielding techniques for improved voltage stress distribution. The coils are designed to withstand continuous operation at either 1.1 or 1.25 times the line-to-line voltage level for Z burden units and the line-to-ground voltage level for Y burden units. For some line-to-ground voltage units, a short-time withstand voltage of 1.9 is available upon request.

Each coil is insulated with mylar film to provide a high dielectric strength between layers. The coils and core are combined to create a complete winding structure that is assembled to a support frame. The entire assembly is vacuum cast in polyurethane for added insulation and protection.

Fuse classifications

These units are available in three fuse classifications: mounted fuse with hardware, unfused with hardware, or unfused without hardware. Optional fuse kits are offered to convert unfused styles to fused styles.

Consult your ABB sales representative concerning overvoltage conditions for designs above the standard rated voltage factor of 1.25.

Baseplate

The baseplate is constructed of corrosion-resistant aluminum and is secured to the encapsulated base support.

Mounting

The VIZ-15 and VIZ-15G can be mounted in upright or cantilever positions.

Curves

Type curves are available upon request.

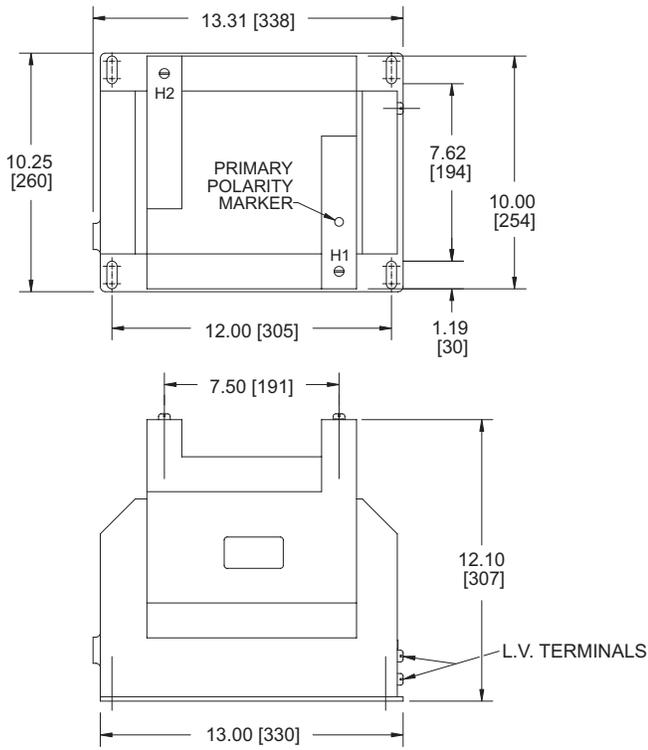

Test reports

IEEE test reports are stored electronically and can be e-mailed in various formats at the time of shipment.

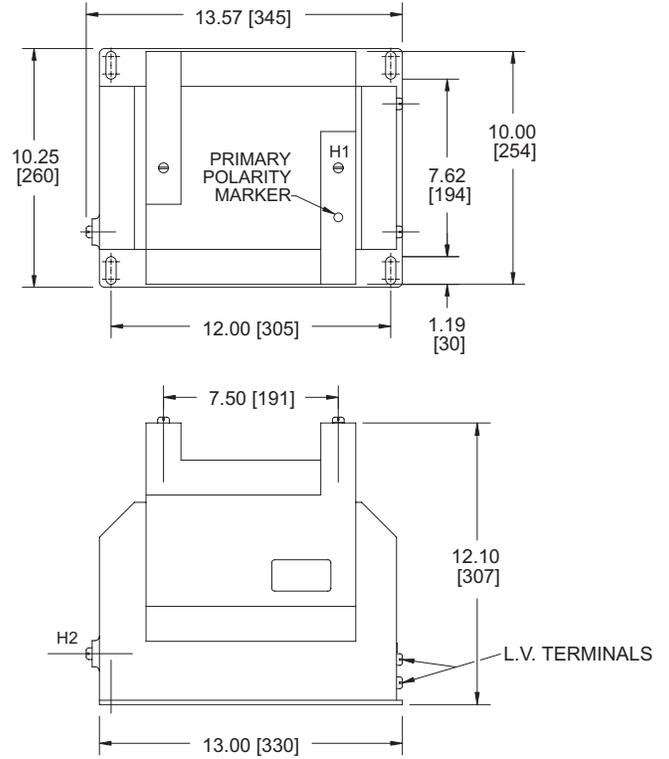

Standards

These units meet all applicable IEEE and NEMA standards.

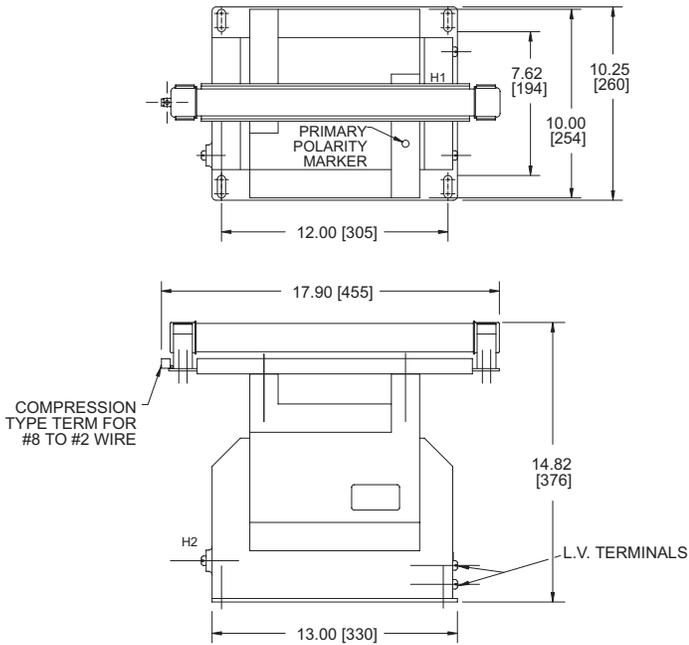

Unit dimensions

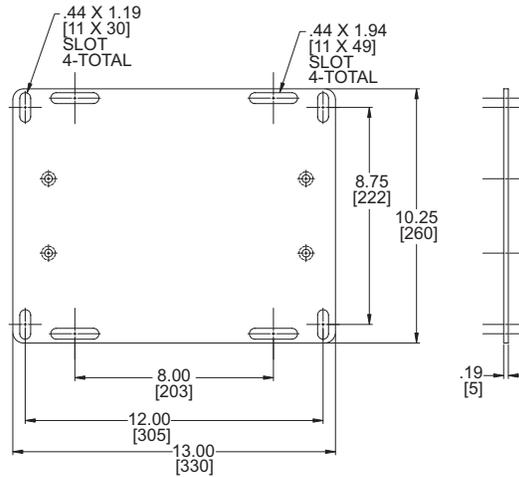

Type VIZ-15, unfused (approximate weight 120 lbs.)

Type VIZ-15G, unfused (approximate weight 120 lbs.)

Type VIZ-15G, fused (approximate weight 122 lbs.)

Note: 50 Hz styles available

Additional styles available upon request. Contact your ABB sales representative or call +1-252-827-3212 for more information.

Optional accessories

Fuse kits to convert unfused VIZ-15 or VIZ-15G to fused style:

- VIZ-15 fuse kit: 9628A05G86
Contains two CLE-PT fuses -
0.5, 25.5 kV (style # 50C5225G04) and hardware
- VIZ-15G fuse kit : 9628A05G89
Contains one CLE-PT fuse -
0.5, 25.5 kV (style # 50C5225G04) and hardware
